

BC Assessment

INFORMATION NOTICE

BC Assessment is currently testing a new method of enhancing this regular program of updating property assessments. From June through August 2009, BC Assessment will conduct a comprehensive property photo update of all residential properties within Nanaimo's city limits.

This new method uses digital photographic equipment mounted inside a vehicle which stops in front of every home to take high-quality pictures of the exterior. BC Assessment has contracted Yotta MVS, Inc., whose technicians will be driving a specially-identified white van for this process. Both sides of the van will have signage that reads:

**BC Assessment
Property Photo Update Initiative
250 – 753-6621**

Over a period of about three months, the van will stop in front of approximately 27,000 single family residences throughout Nanaimo to take photos of each home. We expect to reach about 600 homes a day. We will photograph only property-related images and will not take pictures of people, personal items on the property, or the home's interior.
