

Assessment LinkBC – New Version Enhancements

Some of the new enhancements developed for Assessment LinkBC within the new COGNOS 8 version are:

- The Cubes now include a sidebar with capability to drag and drop items into the summarized table or as an alternate filter source
- The ability to create custom sub-sets in a Cube that will facilitate choosing and reporting multiples of a code
- New cubes created to report Roll Totals for Completed, Revised and Revised Including Supplementaries Rolls as well as Single Year Roll Totals displaying individual Supplementary cycle values
- Report output can be converted directly to Excel, without having to save to CSV first
- A Resources folder for easy access to help instructions
- A pre-defined report for the FOTR001 Folio Listing report, rather than having to drill through from a Cube
- A pre-defined report for the FOTR002 Individual Folio Listing report, which is run by individual Roll number
- New reports of Residential Stratification by Jurisdiction, School District or Regional District reporting the number of folios by value range
